SUMMARY

- Software engineer experienced in building production-grade features across React, Next.js, Node.js, and gRPC-backed services, from real-time visualizations and RBAC systems to optimized backend APIs. exploring microservice architecture and AI-driven workflow automation to build systems that are easier to scale and maintain.

WORK EXPERIENCE

NetAI Inc.

May 2025 – July 2026

Software Engineer

- Built interactive **World Map Visualization** Network Topology with real-time **alert** detection, reducing incident investigation time by approximately **30%**.
- Designed and developed a **Software License Request and Management Dashboard**, enabling sales requests, approval flow, and license visibility, reducing manual coordination delays.
- Implemented **Role-Based Access Control (RBAC)** to securely manage permissions across multiple user roles.
- Integrated **gRPC APIs** and optimized Next.js components, improving application load times by **20%**.

SKILLS

Programming Languages: Java, JavaScript, TypeScript, C++

Frontend: React, Next.js, Redux, HTML, CSS

Backend: Node.js, Express.js, Spring Boot, REST APIs, gRPC

Databases & Caching: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: Docker, AWS (EC2, S3), GitHub Actions, CI/CD

Tools: Git, GitHub, Postman

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Microservices, WebSockets

Languages: English, Hindi, Gujarati

PROJECTS

Talk-a-Tive (Chat Application) [🔗](#)

[Source Code](#)

- Tech Stack: React, NodeJs, ExpressJs, MongoDB, Material UI, Socket.IO
- Designed and implemented **real-time** one-to-one and group chat features supporting over **100+** concurrent users.
- Developed a real-time **live location-sharing** feature with location update latency of under **2 seconds**.
- Integrated Material UI components to improve UI consistency and reduce development effort by **30%**.
- Optimized MongoDB queries using **indexing** and **aggregation pipelines**, reducing API response time by **50%**.

YourPrepPartner (OA Platform) [🔗](#)

[Source Code](#)

- Tech Stack: React, ExpressJs, NodeJs, MongoDB, ChartJs, Redis
- Improved backend API performance by integrating **Redis caching**, reducing query response time by **40%**.
- Accelerated UI development by **30%** using reusable component-based architecture.
- Designed **progress analytics dashboards** to provide detailed user performance insights.
- Deployed the application on **Vercel** (frontend) and **Render** (backend) for scalable production usage.

ACHIEVEMENTS

- Runner-up at **GTU Techfest Code Storm** among **500+** participants by solving **12+** algorithmic and competitive programming challenges under strict time constraints.
- Solved **800+** Data Structures and Algorithms problems across **LeetCode** and **GeeksforGeeks**; secured **Rank 1** on the college-level GFG leaderboard and earned a **5-Star** rating on HackerRank.
- Achieved a **LeetCode Contest Global Rank of 4,940** among **27,000+** participants, demonstrating strong problem-solving and competitive programming skills.

EDUCATION

Ahmedabad Institute of Technology, Gujarat

2021–2025

B.Tech in Information Technology

7.92/10 CGPA
